-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 10 June 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, 5-7, 15 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Pickford (6,261,625) as set forth in paragraph no. 7, Paper No. 20071218.

4. Claims 3, 4, 8-14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pickford in view of Rapp et al (4,469,708) as set forth in paragraph no. 9, Paper No. 20071218.

5. Claims 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pickford in view of Pilgrim et al (6,103,276) and Scheideler et al as set forth in paragraph no. 10, Paper No. 20071218.

6. Applicant's arguments filed June 10, 2008 have been fully considered but they are not persuasive. Applicant's remarks with respect to Pickford are completely without merit. Example 6 of Pickford discloses a coated scrambled egg product and provides an example of a coating, which just happens to be a batter as a result of the presence of starch and binder therein. Additionally, col. 1, lines 10-13 discloses that the core

products in Pickford are coated with a batter. Additionally, Ex. 14 of Pickford discloses a scrambled egg product that is shaped for coating thereby making it inherent that a coated scrambled egg product is well known. Again, the coating is a batter, as explained in col. 1, lines 10-13. Although Rapp et al may not produce scrambled egg products per se, as applicant contends, Rapp et al is merely applied as a secondary reference, as explained in paragraph no. 9 of Paper No. 20071218, as is analogous to and properly combinable with Pickford as both relate to preparation of egg products. Lastly, although Pickford does not include omega-3 fatty acids, as applicant argues, Pilgrim et al and Scheideler et al clearly recognize the benefits of including omega-3 fatty acids in egg products, e.g. scrambled egg products, and thus render it obvious to the skilled artisan to prepare such egg products with the added benefits obtained from the presence of omega-3 fatty acids.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
